DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a "charging" tool, classified in class 451, subclass 443.
 - II. Claims 5-13, drawn to a system for charging a lapping plate, classified in class 451, subclass 56.
 - III. Claims 14-22, drawn to method of charging, e.g. making or forming, a lapping plate, classified in class 51, subclass 298.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination requires a plurality of discrete, discontinuous elements that are symmetrically spaced-apart, and formed of a high density ceramic, whereas the combination only requires a plurality of discrete elements. The subcombination has separate utility such as a dressing tool for a polishing pad.
3. Inventions III and II, or I are related as process and apparatus for its practice.

Art Unit: 3723

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process, such as dressing a polishing pad.

4. Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group I or II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
